DreamLine™

AM/FM/CD STEREO SYSTEM

DIGITAL CONTROL

CERAMIC HEATERS

INTEGRATED SNAP-LOCK

DreamLine Infrared Saunas

DreamLine Infrared Sauna requires no special plumbing or wiring — it plugs into a standard 110V outlet. DreamLine Infrared Sauna offers advanced design, high quality non-toxic Canadian Hemlock wood construction, efficient ceramic heaters and multi-function digital controls - all at an amazing price. This sauna assembles in minutes with integrated snap-lock assembly and costs only a few dollars per month to operate.

Comparing Traditional Saunas with Infrared Saunas

Traditional saunas can cost thousands of dollars, require special installation and dedicated high voltage electrical lines. Traditional saunas operate at over 180 degrees and are difficult for most people to tolerate for more than a few minutes.

DreamLine Infrared Saunas operate at 110 - 130 degrees allowing you to stay in the sauna for longer periods of time, while relaxing to the sounds of your favorite music through the sauna's AM/FM/CD stereo system.

Infrared Saunas and Health

Users of Infrared Saunas report a variety of positive health effects — weight loss, pain management, skin improvements, detoxification and general stress reduction. With DreamLine Infrared Sauna you get the benefits of heat therapy for aches, pains and stiffness. Far Infrared Sauna heat increases circulation and oxygen flow, which reduces inflammation, and may treat pain of arthritis and reduces joint stiffness. Since Far Infrared Sauna heat does not heat the sauna room to high temperatures and works by having infrared heat waves penetrate the body, many people use their Infrared Saunas every day for relaxation and health.

Why a DreamLine Infrared Sauna?

Over the last few years many new companies have appeared on the internet selling infrared saunas. Not all such companies or infrared saunas are "created equal". DreamLine is a manufacturer of many lines of Bathroom and Sauna products. DreamLine is an innovative leader in its field and not an "internet only" virtual company - it operates manufacturing facilities in Asia and has offices and warehouses in United States. DreamLine has been manufacturing traditional saunas since 2002 and all the years of sauna design and knowledge have been applied to the new premium Infrared Sauna line. These saunas not only start with best design but we also use the highest quality materials possible - the wood is the best available grade of Canadian Hemlock and all electrical components have the highest safety approval from ETL. DreamLine offers you the best of Infrared Sauna quality at a great price.
